About this article

In this article, we are going to talk about buttons in XCode 9 and how to add buttons and format them.
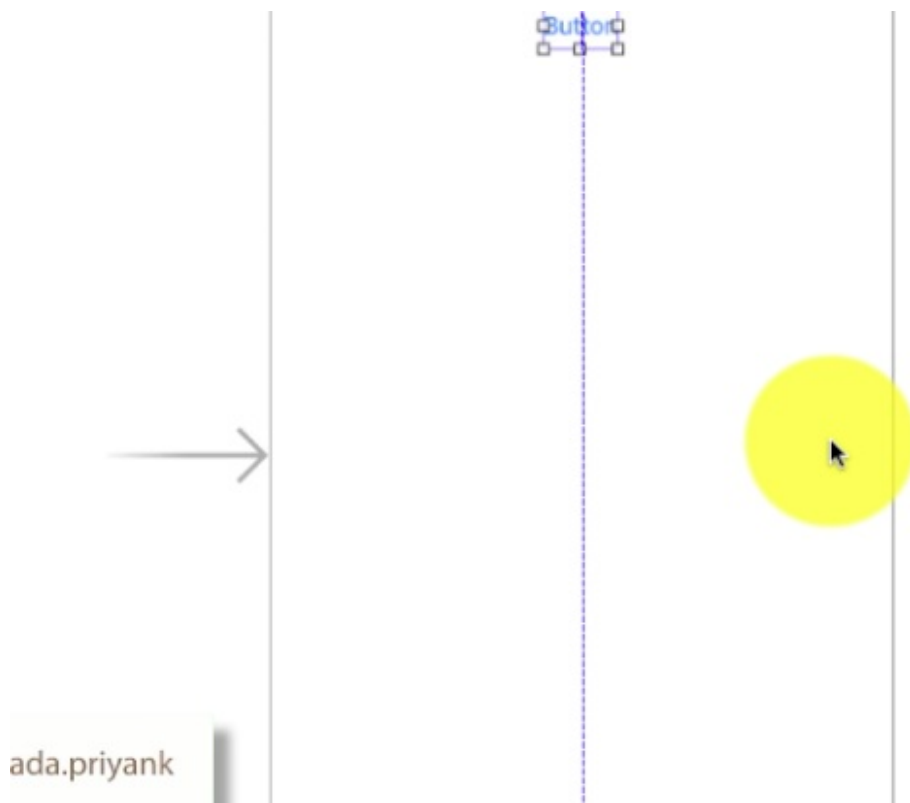

3. iOS 11 and Swift 4 Application Development Course Free in Hindi - Labels in XCode9

Adding Buttons in XCode

You can add buttons by dragging them directly from the utility area in the right bottom area.

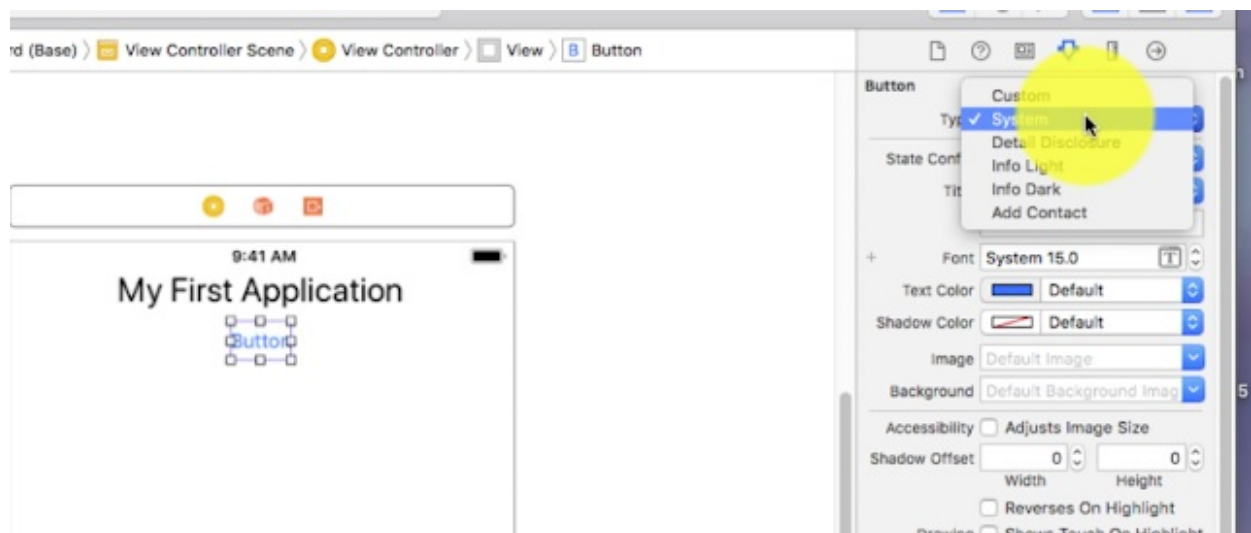

Blue lines will help in placing the buttons in the right place.
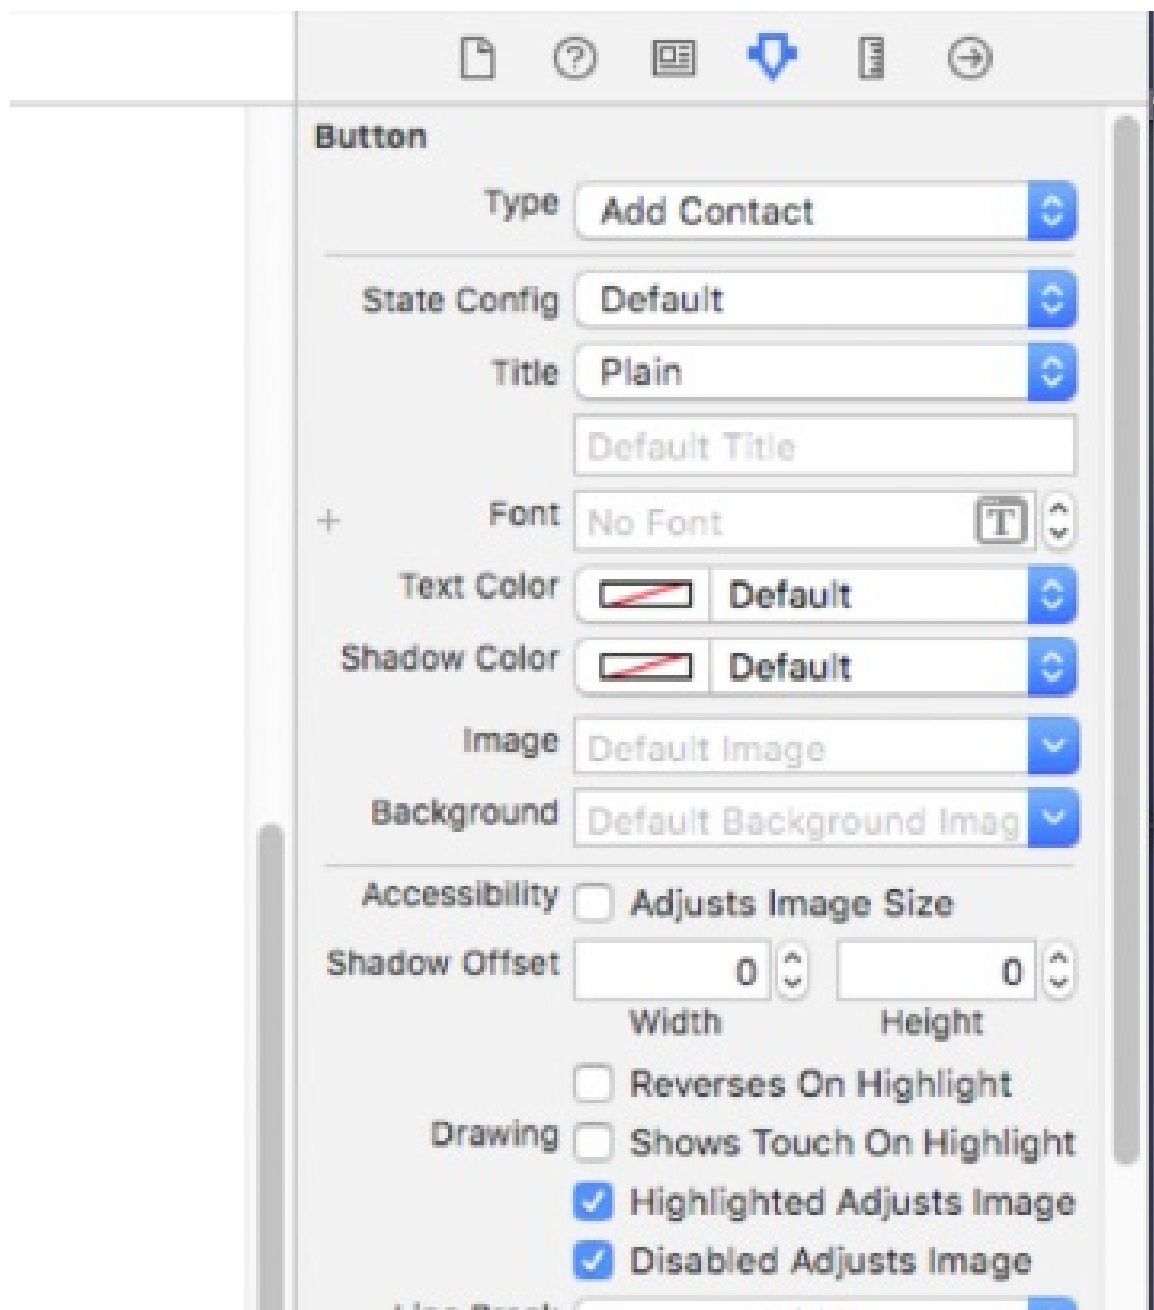

Changing Button Type

Button types can be changed in the utility area above in the right top corner.

There are other edits eg. custom background, text color, shadow and even other options like button title and font.

Button

Type [Add Contact ⇕]

State Config [Default ⇕]

Title [Plain ⇕]

[Default Title]

Font [No Font 𝕋 ⇕]

Text Color [⬛] [Default ⇕]

Shadow Color [⬛] [Default ⇕]

Image [Default Image ⌄]

Background [Default Background Imag ⌄]

Accessibility ☐ Adjusts Image Size

Shadow Offset [0 ⇕] [0 ⇕]

Width   Height

☐ Reverses On Highlight

Drawing ☐ Shows Touch On Highlight

☑ Highlighted Adjusts Image

☑ Disabled Adjusts Image
